

We are expanding by the acquisition
of Ezi-Duct in Australia.

Welcome to the family!

Ezi-Duct becomes Nordfab

Providing a fast, friendly and reliable solution for your dust collection system queries

We are pleased to announce the sale of the Ezi-Duct Pty Ltd business on 28 April, 2022. From this date Ezi-Duct will trade as Nordfab Pty Ltd.

The purchase of the business will provide customers with an international operation that can provide your clean air needs.

Talk to us about clean air!

Australia's leading and largest organisation in the field of dust collection and fume extraction equipment.

The world's fastest ducting

The world's fastest ducting

The Nordfab Group manufacture and supply high performance ducting to trade customers worldwide. As a manufacturer of duct products for environmental filtration systems, we are proud to supply clean air for workers and equipment in workplaces of all sizes and types. Our ducting is an integral part of dust, mist, and fume collection systems around the world.

Branches & factories in Sydney, Melbourne and Brisbane

Nordfab has thousands of happy customers with its equipment installed all over Australia and the world. We are Australia's leading and largest

organisation in the field of dust collection and fume extraction equipment. We have branches and our own factories in Sydney, Melbourne and Brisbane producing the majority of our products.

Designed to meet WHS and clean air environmental regulations

Our products have been engineered and designed in Australia by our Australian team with decades of industry experience. Our product solutions are designed to meet Australia's strict WHS and clean air / environmental regulations.

Nordfab manufactures its ducting in Australia from Australian steel and supplies a huge range of ducting and ducting clamps in galvanised, stainless steel and mild steel. Nordfab has decades of industry experience as well as involvement in Apprenticeships Incentives Program to help train workers with valuable skills.

Fast, Friendly and Reliable

Founded in Denmark 1973, Nordfab are proudly celebrating almost 50 years of service in the Clean Air industry. Since 1973 our company stands for outstanding service and high quality. At Nordfab, we are passionate about our products and truly understand the needs of our customers - which is why we focus on being fast, friendly and reliable.

Fast

We challenge, reconsider and create results. We are modern, proactive and focus on the customer. We take initiative

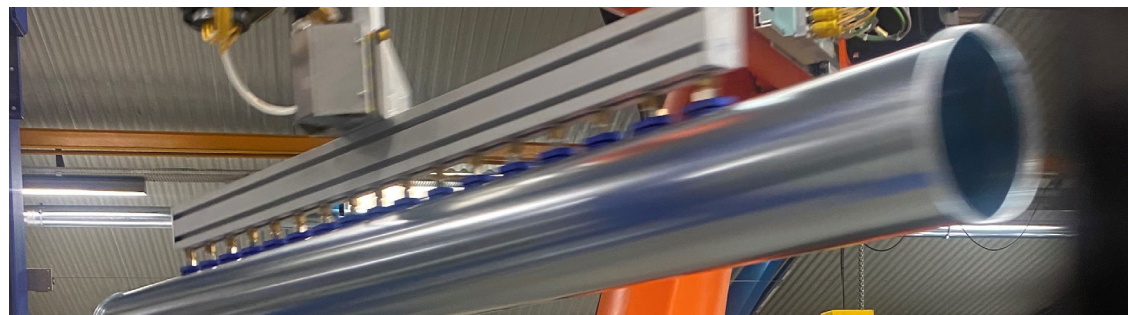

and find profitable solutions to problems that we and our customer face.

Friendly

We are easy to deal with. We understand our customer's needs and create long term partnerships. We are professional and put emphasis on creating personal engagements.

Reliable

We are reliable. Our range of work holds a high quality standard and the customer has confidence in our capabilities.

Ascertaining air flow

When Nordfab takes on a Clean Air project, our team conducts a site visit to evaluate the machines on-site and the dust outlet size of each machine. This ascertains the air flow rate that is required for the machines, determining the size of the dust collector needed. A dust collector that is the incorrect size for the site can be detrimental to a company's ducting system, which can have a major impact on occupational health & safety.

Any additional ducting installed in this plant will be Nordfab ducting.

Maintenance Manager
Wooden Pallet Manufacturer

Why is ducting important for manufacturers?

According to Safe Work Australia, breathing in dusts, gases, fumes and vapors can damage the lungs and potentially lead to conditions like asthma, lung cancer and hard metal pneumoconiosis. Manufacturing workers could be exposed to a range of hazardous material, including:

- airborne flour dusts from mixing ingredients in food manufacturing
- dusts created from wood and textile manufacturing
- welding fumes from metal and machinery manufacturing
- chemical vapours in rubber and chemical manufacturing

This means installing the right ventilation in the manufacturing industry is of the utmost importance, to ensure the health and safety of employees.

As the world's largest manufacturer of clamp-together ducting for dust collection and process ventilation, Nordfab's presence in the Asia Pacific region has given Australian manufacturers access to industrial ventilation that is locally made.

Nordfab's range of eCono Dust Collectors meet Australia's strict OHS and clear air environmental regulations.

Ducting available in galvanised, mild and stainless steel.

Who uses Nordfab ducting?

Nordfab ducting offers an unbeatable solution for all general purpose dust extraction duties. Our products and solutions are commonly used in the following applications:

- Woodworking
- Schools & Universities
- Metalworking
- Concrete
- Recycling
- Automotive
- Plastics
- Textiles
- Powder, Bulk and Solids
- Agriculture
- Paper
- Chemical
- Ventilation
- ...and many more...

Straight ducting

Nordfab straight ducting has the smoothest bore of any ducting available on the Australian market. The smooth bore ensures the best airflow that increases the systems efficiency reducing energy costs. The smooth bore also reduces any likelihood of a blockage.

Bends and fittings

Nordfab offers a large and varied range of bends in angles of 90°, 60°, 45°, 30°, 15° and 7.5°. Nordfab fittings are designed and manufactured using the latest computer controlled design and cutting equipment. This ensures that all our fittings are extremely accurate and of the highest quality.

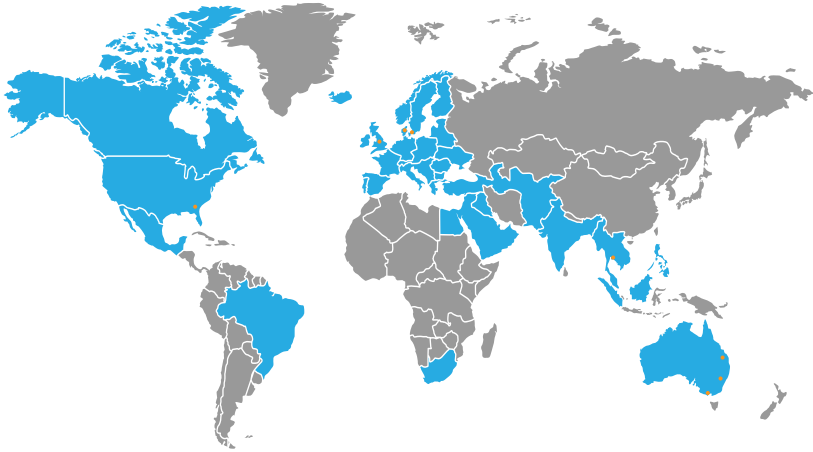

Wide product range

Our standard material is galvanised steel. But feel free to ask us about mild and stainless steel as well.

- Accessories
- Clamps
- Cyclones
- Dampers
- Diverter valves
- Dust collectors
- Flexible ducting
- Flexible hose clamp
- Rotary valves
- Silencers
- Spray booths
- Telescopic ducts

Visit our website at www.nordfab.com or view our catalogue for full product range offered.

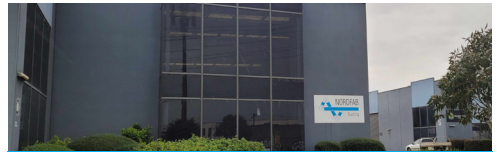

Nordfab's ducting is very quick to install and can easily be pulled apart, moved and reused for cleaning, reconfiguring or relocation. Full range of accessories and installation components available.

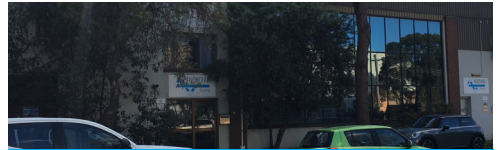

Dedicated customer support team

We stand ready to solve any dust collection issues you may have. Nordfab have branches and our own factories in Sydney, Melbourne and Brisbane where we are producing the majority of our products.
