## Joe Stellino joins the Ezi-Duct team

Ezi-Duct announces with greatest of pleasure that Joe Stellino joined the Ezi-Duct team in March this year. Joe has had nearly 25 years experience in the industry in production, sales & management roles. Joe's role at Ezi-Duct will be the Southern Sydney / NSW Sales Manager & will be based in our Auburn Head Office / Factory. Ezi-Duct Managing Director *Wayne Dockrill* has known & worked with Joe previously and says Joe is a great asset to add our companies already very experienced team. Wayne looks forward to working with Joe as Ezi-Duct rapidly expands its already large product range. Joes contact details are

## National Manufacturing Week 2013 Was a great success for Ezi-Duct

Ezi-Duct had a very successful time exhibiting at the National Manufacturing Week 2013. This year's National Manufacturing Week 2013 (NMW 2013) was held at the Melbourne Convention and Exhibition Center from Tuesday 7th to Friday 10th May.

Ezi-Duct exhibited its Ezi-Arm Fume Arms, The largest range of high quality Flexible Ducting from Norres, Compact automatic self cleaning dust collectors, Vehicle Exhaust Hose Reels + many other products. Wayne Dockrill, M/D of Ezi-Duct said "The majority of visitors were from Victoria but there were also many visitors from all over Australia and New Zealand. As an Australian manufacture itself Ezi-Duct always supports & exhibits at National Manufacturing Week and we have already booked in next year for NMW 2014 at Homebush"

**Strengthening Australian Manufacturing through technology, innovation and education.**

## Ezi-Duct Roof Fans installed at new recycling plant in Sydney's west

When one of Australia's leading recycling companies built a new plant in Sydney's Western suburbs they contacted Ezi-Duct for a solution to improve the air quality inside the building for their employees. In their building they have many large items of equipment operating including a large diesel powered front end loader that creates fumes & heat. They decided to install 4 high capacity Ezi-Duct Roof Ventilator Fans. The Roof Ventilator Fans are manufactured from Fiberglass to cut down on weight & eliminate the possibility of corrosion. Each of the powerful Roof Ventilator Fans extract around 50,000 m<sup>3</sup>/h @ 200 pa and is powered by a 5.5 kW, 3 phase motor. All 4 fans were all installed by a Ezi-Duct in a single day. The recycling plant manager is very happy with the performance of the fans. Wayne Dockrill, M/D of Ezi-Duct said "The Ezi-Duct Roof Ventilator Fans are a quick and simple, low cost solution of reducing the heat and improving the air quality of a factory or building. The Roof Ventilator Fans are very popular in summer so now is a great time to install them"

# Money Saving Dust Collection System Installed at Lambert Kitchens Factory On the NSW South Coast

Lambert Kitchens is a south Coast manufacturer of top quality kitchens. When they decided to upgrade their Dust Collection System in their Unanderra factory they came to Ezi-Duct. Lambert Kitchens have many machines connected to the system including a CNC point to point router & a large CNC Edge Bander. The Dust Collector was a Porex MDC24000S self cleaning Dust Collector, with Ezi-Duct Modular, Flexible Ducting & a Rotary Valve. The new Dust Collector provides suction upwards of 24000 m<sup>3</sup>/h @ 3000 pa & the waste is directly dumped into a 3 m<sup>3</sup> bin. **This equated to big savings labour costs** as there is no need to switch the unit off and labour is kept to a minimum when emptying the bin.

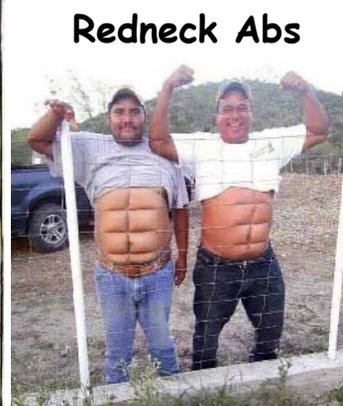

The unit is also supplied with a Porex Variable speed Drive Controller or VSD. The VSD is supplied with a pressure transducer that will sense and automatically turn the power consumption of the fan motor down when one or more of the machines is not in use. **This equates to big savings on power consumption.** Lambert Kitchens is very happy with the performance of the unit, the ducting & the service they received from Ezi-Duct and Porex Environmental Engineering.

Ezi-Duct is Australia's leading supplier of Dust Collection Equipment that includes a huge range of Dust Collectors, Modular Ducting, Flexible Ducting, Fume Arms Fans, Spray Booths + much more. We have branches in Melbourne, Sydney & Brisbane that carry a large amount of products ex stock.

Jean Claude Van Dam, Steven Segal, and Arnold Schwarzenegger all decide to go out trick-or-treating as musical composers for Halloween. They go into a costume store and look for masks. Jean Claude sees a costume that he likes and says, "I think I'll go as Beethoven." Steven Segal sees a costume that grabs his attention and says, "I'll be Mozart." Arnold had a tough time finding a costume that he liked, but he eventually found one that appealed his interest. He picks up a costume and said, "I'll be Bach."

I personally would suggest government. They never go to jail.

Saves on exercise

# Ezi-Duct invests in its Auburn factory with updated and additional machinery

Ezi-Duct has upgraded & purchased additional machinery for its Auburn Factory. In the past year Ezi-Duct has demonstrated a very strong commitment to keep its manufacturing in Australia by adding the following European machinery to its factory equipment, a Spiro Bend Making Machine, a Rico CNC Brake Press, new CNC Rollers, an auto seaming machine (both of which are the first of its type in Australia) & a new RAS power Jenny machine. From China we have added a new set of power plate rollers & a power Jenny wheel. We have also upgraded our manufacturing computer system & software. Wayne Dockrill, M/D of Ezi-Duct said ***"The vast majority of our competitors are agents or resellers for overseas owned companies and make nothing in Australia. Other falsely claim their products are Australian made when all they do is assemble a few components in their warehouse. At Ezi-duct we manufacture the majority of our products here in Australia, we have had 5 apprentices graduate in the last 2 years and are still training new people now. We are committed to ensuring that our company will continue to manufacture here in Australia. With the new machinery we can improve our quality & efficiency providing our customers the highest quality products that are the most cost effected on the market."***

## ***We were dressed and ready to go out for a Dinner & Theatre evening.***

We turned on a 'night light', turned the answering machine on, covered our pet budgie and put the cat in the back garden. We phoned the local Taxi company and requested a taxi. The taxi arrived and we opened the front door to leave the house. As we walked out the door, the cat we had put out in the yard scooted back into the house. We didn't want the cat shut in the house because she always tries to get at the budgie. My wife walked on out to the taxi, while I went back inside to get the cat. The cat ran upstairs, with me in hot pursuit.

Waiting in the cab, my wife didn't want the driver to know that the house would be empty for the night. So, she explained to the taxi driver that I would be out soon. "He's just going upstairs to say Goodbye to my mother."

A few minutes later, I got into the cab. "Sorry I took so long," I said, as we drove away. "That stupid bitch was hiding under the bed. I had to poke her arse with a coat hanger to get her to come out! She tried to take off, so I grabbed her by the neck. Then, I had to wrap her in a blanket to keep her from scratching me. But it worked! I hauled her fat arse downstairs and threw her out into the back garden! ....She'd better not crap in the vegetable garden again!"

The silence in the Taxi was deafening

# Energy Efficient Reverse Pulse Dust Collection System installed at Central Coast Door Manufacture

Daorah Painted Finishes is an Australian manufacturer of top quality doors & kitchens. When they purchased a new CNC Wide Belt Sander they needed to upgrade their Dust Collection System in their Central Coast Factory. As the Dust Collector was collecting extremely fine dust from sanding on painted finishes a reverse pulse Dust Collector was needed. The very fine dust from their sander would load the bags on a normal dust collector very quickly and the systems efficiency will be greatly diminished so Ezi-Duct supplied a Pollex 30.0 kW MDC 2400P Reverse Pulse Dust Collector that automatically continually cleans its 100 filter bags when the unit is operating. This ensure that the Dust Collector is operating at or near to 100% efficiency all the time. Other equipment connected to the new Dust Collector System was their CNC Point to Point Router, Edge Bander, Panel Saw & several other machines.

The Pollex 30.0 kW MDC 2400P was also supplied with a Pollex Variable speed Drive Controller or VSD. The VSD is supplied with a pressure transducer that will sense and **automatically turn the power consumption of the fan motor down** when one or more of the machines is not in use. This equates to big savings on power consumption

Another great feature of the new Dust Collector is that dust is deposited directly into a 3 m<sup>3</sup> rubbish bin via an airlock Rotary Valve. This equates to big savings on labour costs as there is **no need to switch the dust collection unit off and shut down the factory when emptying the bin**. The operator simply turns the Rotary Valve off ( not the Dust Collector ) & back on when the bin is emptied .

Daorah Painted Finishes is very happy with the performance of the unit, the ducting & the service they received from Ezi-Duct and Pollex Environmental Engineering.

Ezi-Duct is Australians leading supplier of Dust Collection Equipment that includes a huge range of Dust Collectors, Modular Ducting, Flexible Ducting, Fume Arms Fans, Spray Booths + much more. We have branches in Melbourne, Sydney & Brisbane that carry a large amount of products ex stock.

A man calls Animal Control to get a crazed gorilla off his roof.

A van pulls up and an old man gets out, carrying a small dog, a baseball bat and a gun. He hands the man the gun.

"OK, here's what we do. I'm going to go up onto your roof and threaten the gorilla with this baseball bat until he falls down. When he falls down, this little dog will bite him in the Testicles until he's incapacitated."

"Great," says the man, "but what's the gun for?"

"If I fall down instead of the gorilla, shoot the dog."

# New and Improved Polex MDC S Self Cleaning Shaker Dust Collector

Ezi-Duct is proud to announce a new and improved MDC S Dust Collector. The innovative Australian Engineers at Polex Environmental Engineering have improved the MDC Shaker Dust Collector range. The new models are manufactured from 60% thicker material and now operate under negative pressure. They are supplied with a clean air, high efficiency fan that produces 25 –30 % more airflow for the same amount of energy. As all waste is deposited directly into the Dust Collectors hopper. This eliminates any “dirty” air ( saw dust or shavings ) from damaging or causing wear on the fans impeller.

The units are supplied standard with a Rotary ( airlock ) Valve that feeds the collected waste from the Dust Collectors Hopper directly into a 3m<sup>3</sup> waste bin. The waste bin can be emptied without the Dust Collector being turned off by simply turning off the Rotary Valve. This eliminates the need for stopping production in the factory. This equated to big savings in labour costs. All Units are available with a energy saving VSD as an option

The units are available through all of Ezi-Ducts Branches in Melbourne, Sydney & Brisbane. As Ezi-Duct also supplied the largest range of modular & flexible ducting on the Australian market we can supply your whole new dust collection system. Call us for more information

## Baseball in Heaven

Two old men, Abe and Sol, sit on a park bench feeding pigeons and talking about baseball. Abe turns to Sol and asks, "Do you think there's baseball in Heaven?" Sol thinks about it for a minute and replies, "I dunno. But let's make a deal -- if I die first, I'll come back and tell you if there's baseball in Heaven, and if you die first, you do the same." They shake on it and sadly, a few months later, poor Abe passes on. Soon afterward, Sol sits in the park feeding the pigeons by himself and hears a voice whisper, "Sol... Sol... "

Sol responds, "Abe! Is that you?"

"Yes it is, Sol," whispers Abe's ghost.

Sol, still amazed, asks, "So, is there baseball in Heaven?"

"Well," says Abe, "I've got good news and bad news."

"Gimme the good news first," says Sol.

Abe says, "Well, there *is* baseball in Heaven."

Sol says, "That's great! What news could be bad enough to ruin that?"

Abe sighs and whispers, "You're pitching on Friday."

## \$ AUD Fall good news for local manufactures and exporters

Good news for local Australian manufactures and exporters. The AUD has come down from its high level and is around the USD 0.90 mark. It has fallen from a high of 1.0547 on 11/4/13 to a low of 0.88.95 on the 16/8/13. Many experts say it will settle around the 0.85 mark. This makes prices go up on imported good by 15 - 20 % and earns extra income for Australian Exporters

## ***Last Laugh***

There were three couples, one elderly, one middle aged, and one newlywed, that wanted to join a church. So the minister tells them that in order to be members they must abstain from sex for two whole weeks. After two weeks, the minister asks the elderly couple if they had abstained.

"Yes, no problem!" So the minister welcomes them to the church. Then he asks the middle aged couple the same question

"Well, after one week, the husband had to sleep on the couch, but we made it!" So the minister welcomes them to the church. Then the minister asks the newlywed couple if they had abstained from sex for two weeks.

"We were unable to abstain. On the third day, my wife dropped a can of corn and when she bent over to pick it up, LUST and PASSION overcame me!"

"I'm sorry," the minister says, "but you are both banned from this church!"

"That's okay," says the husband, "We were banned from the supermarket, too."
